⁽¹⁾ Refer to page 6 for definitions of our non-GAAP financial measures and related GAAP to non-GAAP reconciliations.

⁽²⁾ Diluted net income per share includes the impact of our convertible debt using the if-converted method, which assumes full share settlement. Interest expense is added back to net income and weighted average shares includes total shares issuable at conversion.

Non-GAAP Financial Measures

To supplement our condensed consolidated financial statements prepared and presented in accordance with U.S. generally accepted accounting principles, or GAAP, our key non-GAAP performance measures include adjusted EBITDA, non-GAAP net income (loss), free cash flow and adjusted free cash flow as defined below. We use adjusted EBITDA and non-GAAP net income (loss) as key measures to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short- and long-term operating plans. We use free cash flow and adjusted free cash flow as key measures when assessing our sources of liquidity, capital resources, and quality of earnings. We believe these measures provide useful information for period-to-period comparisons of our business to allow investors and others to understand and evaluate our operating results in the same manner as our management and board of directors. Our presentation of these non-GAAP financial measures is not meant to be considered in isolation or as a substitute for our financial results prepared in accordance with GAAP, and our non-GAAP measures may be different from similarly termed non-GAAP measures used by other companies.

Adjusted EBITDA

We define adjusted EBITDA as net income (loss) determined in accordance with GAAP, excluding, if applicable for the periods presented, the effects of stock-based compensation; depreciation and amortization; restructuring costs; settlement income and related costs; induced conversion expense; other income, net; interest expense; acquisition related expense and related purchase accounting adjustments; and income tax benefit (expense).

Non-GAAP Net Income (Loss)

We define non-GAAP net income as net income (loss), excluding, if applicable for the periods presented, the effects of stock-based compensation; depreciation and amortization; restructuring costs; settlement income and related costs; induced conversion expense; acquisition related expense and related purchase accounting adjustments; and the corresponding income tax impacts of adjustments to net income (loss).

Free cash flow

We define free cash flow as net cash provided by (used in) operating activities, determined in accordance with GAAP, less purchases of property and equipment. We define adjusted free cash flow as free cash flow less cash received from gain on litigation settlement.
